Book of Rules

GAME OVERVIEW AND OBJECTIVE

You are an air-shipwright: builder of flying machines used by the dreams to traverse the skies of the Oniverse! You have no equal when it comes to drafting the best blueprints, locating the finest construction materials, and recruiting the most experienced crews.

The Archonts have given you a weighty charge: to build a new fleet, more beautiful than any that has ever sailed the skies. You must complete this prestigious task before your resources are exhausted!

Aerion is a solo/cooperative game for one to two players. Your goal is to build six airships, each represented by a ship token. Each ship must be built using blueprints, materials, and crew that you must acquire each turn by rolling dice. To get the die results you need, you can reroll one or more of your dice. However, each reroll has a cost that brings you closer to losing the game!

You win the game by building the six ships before all the cards are discarded.

Six expansions are also included. Each expansion is independent from the others, and they can be freely combined. The base game and the expansion have identifying patterns at the bottom of the corresponding cards.

BASE GAME COMPONENTS

36 ELEMENT CARDS
(12 CREW CARDS, 12 MATERIAL CARDS, 12 BLUEPRINT CARDS)

12 BOOK CARDS

6 SHIP TOKENS

3 PIXIE TOKENS

6 DICE

EXPANSIONS

85 EXPANSION CARDS

1 HELLKITE PAWN

6 FACTORY CARDS

24 HOURGLASS CARDS

3 PIER CARDS

12 WORKER CARDS

1 FLAGSHIP TOKEN

12 EGG CARDS

12 HAMMER BIRD CARDS

8 OUTPOST CARDS

8 LAIR CARDS

6 STONE CLOUD TOKENS

BASE GAME: SETUP

These rules describe setup and gameplay for the solo game, without expansions. For the two-player game rules, see page 11.

1. Place the six Ship tokens on the table, with the Project side faceup. Take the six dice.

Project Side

2. Place the three Pixie tokens next to the Ships.

Base Game Indicator

3. Gather the 48 Resource cards with the base game indicator at the bottom of the cards and separate them into six different decks based on the letter combinations on the back of each card. Shuffle each deck separately. Place the six decks on the table, leaving room behind each for a discard pile. Reveal the top card of each deck and place those cards faceup in front of the decks.

AA+BB
The six faceup cards form the **Display**. Leave room under the Display for four separate areas: **two Workshops**, **one Pulpit** and **one Reserve**.

KEY CONCEPTS

In **Aerion**, you roll specific combinations of die results to take cards from the Display and combine them to build Ships. On your turn, you roll the dice and take Resource cards from the Display. There are two types of Resource cards: Element cards are used to build Ships, while Book cards provide beneficial effects to help you accomplish your goal.

ELEMENTS: BLUEPRINTS, MATERIALS, AND CREW

There are three Elements needed to build each Ship: **one Blueprint**, **one Material**, and **one Crew**, shown on the Project side of each Ship token. Each of these Element cards shows its own icon in each of the top corners. The bottom corners of each card show the icons of the other Element cards you can combine it with to build a Ship.

Icons

Combinations To Build Ships

2 different Crew cards (Incubi, Sognae)

3 different Material cards (Helices, Nuts, Cocoons)

6 different Blueprint cards (Glider, Hellinaut, Bee, Nacelle, Hornet, Trihellix)

WORKSHOPS

You place the Element cards you acquire in your Workshops as you work towards completing the Ships. Each Workshop can store up to three cards: one Blueprint, one Material, and one Crew. **Each Workshop can be used to build only one specific Ship at a time**. When placing Element cards, the Blueprint and Material cards must be placed before the Crew card can be placed. **The Crew must be placed last**. The Blueprint and Material cards can be placed in any order.

BOOKS

You place the Book cards you acquire in your Pulpit. Your Pulpit can store only one Book card at a time. Book cards in your Pulpit can be discarded for different effects during your turn:

- During the Roll phase of your turn, you can discard a Book card to reroll any number of dice up to three times. You can reroll different dice each time.

- During the Acquire phase of your turn, you can discard a Book card to add an acquired Element card (not a Book card) to your Reserve if you cannot, or do not want to, place it in one of your Workshops.

- During any phase, you can discard a Book card to take up to two discarded Element cards (not Book cards) from the same discard pile and place them on top of their original deck in any order.

RESERVE

The Reserve stores Element cards through the use of Book cards. The Reserve can store any number of Element cards. You can move Element cards from your Reserve to your Workshops **at any time**.

PIXIES

Pixies can be used to modify your rolls. After rolling dice, you can spend a Pixie to **change one die to the number of your choice**. You can spend any number of Pixies during a single Phase 1: Roll. Return spent Pixies to the box.
PLAYING THE GAME

Aerion is played over a series of turns, each consisting of three phases:

1. Roll   2. Acquire   3. Replenish

1. ROLL

Roll the six dice. The top of each Resource card shows the roll needed to acquire it, such as two pair or four of a kind.

The object during Phase 1: Roll is to roll the result necessary to take a Resource card you need from the Display. If there is a card in the Display that you can acquire with your roll, you can proceed to Phase 2: Acquire.

REROLLING

If your roll does not allow you to acquire one of the cards in the Display, or if you want to try to acquire a card that your current roll does not allow you to acquire, discard one card from the Display to reroll any number of dice. Each deck has its own discard pile above to it; place the discarded card faceup in the corresponding discard pile. You can look through the discard piles at any time.

You can repeat this multiple times, as long as there are cards left in the Display. You can reroll any combination of dice each time you reroll. You must continue to discard cards until you can acquire a card, or until there is only one card remaining in the Display. If there is only one card remaining in the Display, and you cannot or do not want to acquire it, discard that card and proceed directly to Phase 3: Replenish, skipping Phase 2: Acquire.

You have the Glider blueprint card and Helix material card in one of your Workshops and want to acquire the Incubi crew card to complete the Glider. There is an Incubi crew card available in the Display, which requires AA+BB to acquire (two pairs). You roll the six dice and get 2, 3, 4, 5, 5, 5, which will not allow you to acquire that crew card. You discard a card from the Display to reroll the 2, 3, 4, and 5, and two of these dice roll 2's. You now have two 2's and two 5's, so you continue to Phase 2: Acquire to acquire the Incubi crew card.

Do not reveal new cards to replace discarded ones. Cards in the Display are replaced only during Phase 3: Replenish. Keep in mind that every time you discard a card to reroll, the number of cards available this turn decreases, and you move closer to defeat.

2. ACQUIRE

Choose and take one Resource card in the Display that you can acquire with your roll. Place that card based on the card type:

- **Element:** Place an Element card in one of your Workshops. If you cannot or do not want to place that Element card in one of your Workshops (see "Workshops" on page 7), you can discard a Book card from your Pulpit to place it in your Reserve. Otherwise, immediately discard the acquired Element card.

  When you have acquired the three Elements needed to complete an unbuilt ship in one of your Workshops (Blueprint, Material and, lastly, Crew), flip that Ship to its Flying side and discard the three Element cards from that Workshop. Place discarded cards in the discard pile of their original deck.

- **Book:** Place the Book card in your Pulpit, if possible. If there is already a Book card in your Pulpit, you can discard it to retrieve two discarded Element cards from one discard pile (see "Books & Pulpit" on page 8), then place the newly acquired Book card in the Pulpit.

Some rolls allow you to choose between multiple cards in the Display. You can acquire only **one** card during a single Phase 2: Acquire. Note that sets of results do not need do be different (for example, AA+BB could be two pairs of the same number), but the A+B+C+D+E result is a set of dice in numerical order, either from 1 to 5 or from 2 to 6.

3. REPLENISH

For every deck without a card in the Display, reveal the top card of that deck and place it faceup in front of the deck to add that card to the Display. If there are no cards remaining in a deck, that deck remains empty for the rest of the game. Any cards remaining in the Display are not replaced. **Cards stay in the Display until they are discarded or acquired**.

If you discard a Book card to retrieve cards from a discard pile, and that deck has no cards remaining, the retrieved cards form the corresponding deck.

END OF THE GAME

If all six Ships are completed by flipping them to their Flying sides, you win the game! If all six Resource decks and the Display are empty, you lose the game.

INCREASING THE DIFFICULTY

For a more difficult game, return one, two, or three Pixies to the box during setup.

RULES FOR TWO PLAYERS

The two-player game follows the normal rules, with the following exceptions:

SETUP

Each player randomly takes three Ship tokens. The most experienced player takes the first turn. Players alternate taking turns and going through the three phases, as in the solo game. Each player has one Pulpit, one Reserve and one Workshop. Both players also share a third common Workshop that they can both place cards in.

GAMEPLAY

You cannot place cards into the other player's Workshop, Pulpit, or Reserve. Both players can place Element cards in the common Workshop, including cards from their Reserves. In order to build a Ship in the common Workshop, the player who has the Ship token must add the Crew card to complete the Ship.

Each player must build their own three Ships. If a player would build a Ship and does not have the corresponding token, nothing happens: the Element cards are discarded but no Ship token is flipped.

EXPANSION 1: THE FLAGSHIP

FLAGSHIP TOKEN

6 FACTORY CARDS

SETUP

Place the Flagship token next to the Ship tokens, with the Project side faceup. Roll two dice, rerolling as necessary until you get two different results. Take the two Factory cards showing the two numbers you rolled and place them faceup in front of you. Return the unused Factory cards to the box.

FACTORY CARDS

The Factory cards give you new abilities that remain in effect throughout the game.

The Library (1)

You can store any number of Book cards in your Pulpit.

When you discard a Book card to reroll dice, you can reroll up to four times instead of three.

The Archive (2)

When you discard a Book card to retrieve cards from a discard pile, you can retrieve up to three cards instead of two. These cards must come from the same discard pile.

The Security Department (3)

If you have discarded one or more cards from the Display during Phase 1: Roll, you can end Phase 1: Roll immediately, skip Phase 2: Acquire, and go directly to Phase 3: Replenish.

The Research Lab (4)

After your first roll in each Phase 1: Roll, you can reroll **all six** dice.

You must then either continue Phase 1: Roll as normal, or proceed directly to Phase 2: Acquire.

The Logistics Department (5)

When you discard a card from the Display to reroll, you can choose to change one die to its opposite face instead of rerolling any dice. For example, you can change a 1 to a 6 or a 2 to a 5. You can discard to change a die any number of times during your turn.

The Game Room (6)

You can acquire Crew cards and place them in a Workshop (or on the Flagship) even if the two other Element cards are not present.

THE FLAGSHIP

The Flagship token is a Ship token, and you must flip it to its Flying side in order to win the game, like the Ship tokens from the base game. The Flagship differs from the base game Ship tokens in the following ways:

- The Flagship requires one copy of each of the three Material cards (Cocoon, Nut, and Helix) and each of the two Crew cards (Incubi and Sognae). The Flagship does not require a Blueprint card.
- The Flagship is not built in one of the Workshops. Instead of placing an acquired Element into a Workshop, you can instead place that Element directly onto the Flagship to contribute towards building it.

You must still place the two Crew cards on the Flagship token as the last two cards (unless you have the Game Room Factory card). You can place the two Crew cards in any order. When all five Element cards have been placed on the Flagship token, discard those cards and flip the Flagship to its Flying side.

ADDITIONAL VICTORY CONDITION

To win the game, you must also complete the Flagship. You can complete the Flagship whether or not you have completed the Ships from the base game.

TWO-PLAYER GAME

In a two-player game, both players benefit from the Factory cards, and both players can place Element cards on the Flagship.

INCREASING THE DIFFICULTY: EXPAND THE FACTORY

Shuffle the Factory cards into their matching Resource decks. You start the game without any Factory cards. You can acquire up to two Factory cards during the game with the appropriate roll, the same way you would acquire a Resource card, placing it in front of you when you do so. A Factory card's effect is active as soon as you acquire it. In a two-player game, both players benefit from a Factory card that has been acquired, regardless of who acquired it.

If a Factory card is in the Display, you can discard it to reroll, as if it were a Resource card. When you discard a Book card from the Pulpit to retrieve cards from a discard pile, you can retrieve a Factory card. You cannot have more than two Factory cards active. If you would acquire a third Factory card, you can discard one of the two previously acquired Factory cards to replace it with the newly acquired Factory card. Otherwise, discard the new Factory card.

EXPANSION 2: THE HOURGLASSES

24 HOURGLASS
CARDS

SETUP

Shuffle the 24 Hourglass cards into their matching Resource decks.

HOURGLASS CARDS

The Hourglass cards are Resource cards and can be acquired in the same way as other Resource cards. Place acquired Hourglass cards next to the Ship tokens.

An Hourglass card in the Display can be discarded to reroll, as with other Resource cards. When you discard a Book card from the Pulpit to retrieve cards from a discard pile, you can retrieve Hourglass cards as if they were Element cards.

At the beginning of Phase 3: Replenish, discard any Hourglass cards remaining in the Display.

ADDITIONAL VICTORY CONDITION

To win the game, you must also acquire six different Hourglass cards, one from each deck. You can acquire the Hourglasses whether or not you have completed the Ships.

TWO-PLAYER GAME

In a two-player game, Hourglasses acquired by either player count towards the six necessary to win.

INCREASING THE DIFFICULTY: SHORT ON TIME

Play with only 18 Hourglass cards, three in each deck. Return the six unused Hourglass cards to the box.

EXPANSION 3: THE STONE CLOUDS

6 STONE CLOUD TOKENS

12 HAMMER BIRD CARDS

SETUP

Shuffle the 12 Hammer Bird cards into their matching Resource decks.

Place the six Stone Cloud tokens near the Ships with the intact side faceup.

Intact Side

DEMOLITION

During your turn, instead of resolving Phase 2: Acquire, you can resolve Phase 2: Demolish.

During Phase 2: Demolish, you can flip or discard Stone Cloud tokens. You gain demolition points equal to the total value of your dice, plus additional demolition points for discarding Hammer Birds. For every 30 demolition points you have, you can flip one intact Stone Cloud to its cracked side or discard one cracked Stone Cloud. Stone Clouds must be flipped to their cracked side before they can be discarded. Return discarded Stone Clouds to the box.

You cannot acquire cards from the Display during Phase 2: Demolish.

You cannot resolve Phase 2: Demolish if your roll does not total up to at least 30 (with your six dice plus Hammer Bird cards).

HAMMER BIRD CARDS

The Hammer Bird cards are Resource cards, but cannot be acquired.

You can discard a Hammer Bird card to either:

- Reroll during Phase 1: Roll, as with other Resource cards.
- Add to your dice total during Phase 2: Demolish. The more Hammer Bird cards you discard during Phase 2: Demolish, the more demolition points you add, as shown in the table below:

Discarded Hammer Bird cards	1	2	3
Demolition points	5	40	100

When you discard a Book card from your Pulpit to retrieve cards from a discard pile, you can retrieve Hammer Bird cards as if they were Element cards. You cannot place Hammer Bird cards in the Reserve.

ADDITIONAL VICTORY CONDITION

To win the game, you must also discard the six Stone Cloud tokens. You can discard the Stone Clouds whether or not you have completed the Ships.

INCREASING THE DIFFICULTY: THE FLOCK

During Phase 2: Demolish, if you want to discard Hammer Bird cards, you must discard at least two.

You can still choose to resolve Phase 2: Demolish without using any Hammer Bird cards if your total is at least 30.

INCREASING THE DIFFICULTY: PINNED DOWN!

During setup, place one Stone Cloud token on each of the six Ship tokens from the base game, with the intact side faceup.

In order to turn a Ship token on its Flying side, you must first discard the Stone Cloud token on that Ship token.

EXPANSION 4: THE PIERS

3 PIER CARDS

12 WORKER CARDS

SETUP

Shuffle the 12 Worker cards into their matching Resource decks.

Place the three Pier cards on the table with the Construction side faceup.

Leave room for a new area next to the Pulpit: the Payroll.

WORKER CARDS

The Worker cards are Resource cards, but cannot be acquired.

Construction Side

During Phase 1: Roll, Worker cards can be used in two different ways:

- Discard a Worker card from the Display to reroll, as with other Resource cards.
- Place a Worker card from the Display into your Payroll to reroll up to three times. You will need to pay this Worker before the end of the game. You can have any number of Worker cards in your Payroll.

When you discard a Book card from your Pulpit to retrieve cards from a discard pile, you can retrieve Worker cards as if they were Element cards. You cannot place Worker cards in the Reserve.

PAY A WORKER

During your turn, instead of resolving Phase 2: Acquire, you can resolve Phase 2: Payday if your dice total is least 26.

During Phase 2: Payday, you can discard one Worker card from your Payroll.

You cannot acquire cards from the Display during Phase 2: Payday.

BUILD A PIER

During your turn, instead of resolving Phase 2: Acquire, you can resolve Phase 2: Build if you have at least five of a single number (five of a kind) as your roll.

During Phase 2: Build, you can flip one Pier card from its Construction side to its Built side.

You cannot acquire cards from the Display during Phase 2: Build.

ADDITIONAL VICTORY CONDITION

To win the game, you must also flip the three Pier cards to their Built side, and you must not have any Workers in your Payroll. You can flip the Piers and discard the Workers from your Payroll whether or not you have completed the Ships.

TWO-PLAYER GAME

Each player has their own Payroll and must discard the workers they hired on their own turn. Both players cannot have any Workers in their Payroll in order to win.

INCREASING THE DIFFICULTY: NO DEBT POLICY

You can have only one Worker card in your Payroll at a time.

In a two player game, both players share one common Payroll, instead of each having a separate Payroll.
EXPANSION 5: HAMMER BIRD EGGS

SETUP

Shuffle the 12 Egg cards into their matching Resource decks.

EGG CARDS

Egg cards cannot be discarded from the Display. If an Egg card is in the Display and you roll the appropriate dice result, you can acquire it. Place acquired Egg cards in a pile next to the Ship tokens.

12 EGG CARDS

At any time during your turn, you can choose a deck, then return any number of acquired Egg cards to the box. Reveal that many cards from the top of the chosen deck. You can choose one of the revealed cards and place it in front of the corresponding deck in the Display. If there is already a card in the Display from that deck, shuffle that card, along with any other cards revealed by the Egg cards, back into that deck. If there are no cards from that deck currently in the Display, place the chosen card in the Display in front of that deck, then shuffle any other cards revealed by the Egg cards back into the deck.

You can use Egg cards any number of times during a turn.

THE 'SAVE SHELL' RULE

After rolling, if your roll does not allow you to acquire any cards from the Display, and there are only Egg cards left in the Display, you can skip Phase 2: Acquire without acquiring any cards (or, when playing with one or more other expansions, without resolving any of the replacement Phase 2 options). Go directly to Phase 3: Replenish.

ADDITIONAL DEFEAT CONDITION

If there are only Egg cards in the Display at the beginning of your turn, you must acquire one of those cards during your turn. If you do not, you lose the game.

TWO PLAYER GAME

Both players place the acquired Egg cards in one common pile. They can be used by either player during their turn.

INCREASING THE DIFFICULTY: FRAGILE SHELLS

Play without the 'Save Shell' rule: if you cannot acquire a card during Phase 2: Acquire, and there are only Egg cards left in the Display, you lose the game.
EXPANSION 6: THE HELLKITE

1 HELLKITE PAWN

8 OUTPOST CARDS

8 LAIR CARDS

SETUP

Shuffle the eight Lair cards, return two cards to the box without looking at them, and place the six remaining cards facedown in a row above the Resource decks.

Shuffle the eight Outpost cards, return two cards to the box, and place one of the remaining six faceup on top of each of the Lair cards. Place the Hellkite pawn on the leftmost Outpost card.

OUTPOST CARDS

Each Outpost card depicts a type of Resource card: Book, Blueprint, Material, or Crew. If the Hellkite pawn is on an Outpost card, you cannot acquire the Resource card type shown on that card.

LAIR CARDS

Each Lair card depicts a type of Resource card: Book, Blueprint, Material, or Crew. When you destroy a Lair card, you can immediately acquire one Resource card of that type from the Display, if available, as if you had acquired it during Phase 2: Acquire.

HUNTING THE HELLKITE

During your turn, instead of resolving Phase 2: Acquire, you can resolve Phase 2: Hunt. Add your six dice together. If the total is 15 or less, you can destroy the Outpost or Lair the Hellkite pawn is currently on.

When you destroy an Outpost or Lair card, return that card to the box. When you destroy an Outpost card, flip the Lair card that was underneath it faceup and place the Hellkite pawn on that Lair card. That Lair card is now vulnerable, and you can target it with a Hunt action if the Hellkite is on it during a later turn. You cannot target a Lair card if there is an Outpost card on it.

When you destroy a Lair card, move the Hellkite pawn to the next Outpost/Lair card to its right. If the Hellkite is on the rightmost Outpost/Lair card, move it to the leftmost Outpost/Lair card. If there are no Outpost/Lair cards remaining in play, you have defeated the Hellkite! Return the pawn to the box.

You cannot acquire cards from the Display during Phase 2: Hunt, except by destroying a Lair card.

MOVING THE HELLKITE

At the beginning of Phase 3: Replenish, move the Hellkite pawn to the next Outpost/Lair card to the right. If the Hellkite pawn is on the rightmost Outpost/Lair card, move it to the leftmost Outpost/Lair card. If there is only one Outpost/Lair card left, the Hellkite pawn does not move.

ADDITIONAL VICTORY CONDITION

To win the game, you must also defeat the Hellkite by destroying all Outpost and Lair cards. You can defeat the Hellkite whether or not you have completed the Ships.

INCREASING THE DIFFICULTY: THE IMPREGNABLE FORTRESS

You can destroy only the leftmost or rightmost Outpost cards. You can destroy Lair cards only after **all** Outpost cards have been destroyed. After all Outpost cards have been destroyed, you can destroy only the leftmost or rightmost Lair cards.

You can still destroy an Outpost/Lair card only if the Hellkite pawn is on it.
