

The best master builders in the whole of Europe and Arabia want to demonstrate their skill. Employ the most suitable teams of builders and make sure that you always have enough of the right currency. Because no matter whether they are stonemasons from the north or horticulturalists

from the south, they all want a proper wage and insist on their "native" currency. With their help towers can be constructed, gardens laid out, pavilions and arcades erected and seraglios and chambers built. Compete against your opponents to build the ALHAMBRA.

## Equipment

- 6 starting tiles - showing the famous Lion Fountain

- 54 building tiles - showing 6 different kinds of building. They are the pieces you use to build your own Alhambra. They have up to three wall segments on them.

- 12 counters - each player has a counter for the scoring board and a counter for his starting tile.
- 108 money cards in four currencies - these are used to buy the building tiles from the market to make your own Alhambra.

Money cards in four different colours: blue, green, orange and yellow, with values from 1 to 9.

- 2 scoring cards - which turn up during the game (in the pile of money cards).

scoring cards

- 1 building market - with four squares, each for one building tile. There is a different currency for each square.
- 1 scoring board - to show each player's score using the ...

- 6 tile reserve boards with points tables
- 1 bag
- 1 set of rules

## Object of the game

Players who have the **most building tiles** of each kind in their Alhambra at the right time - in the scoring rounds - are awarded points, the exact amount depending on the type of building. Players also receive points for the **longest part of wall they have built around their Alhambra.**

More points are awarded in each scoring round. The winner is the player who has been awarded the most points by the end of the game.

Price Number Name of the building

2-8	7 <sub>x</sub>	◆
3-9	7 <sub>x</sub>	◆◆
4-10	9 <sub>x</sub>	◆◆◆
5-11	9 <sub>x</sub>	◆◆◆◆
6-12	11 <sub>x</sub>	◆◆◆◆◆
7-13	11 <sub>x</sub>	◆◆◆◆◆◆

There are 6 different kinds of buildings. The table shows the prices of the buildings and how many of each of the buildings there are.

## Getting ready to play

- Each player is given a **starting tile**, which they place on the table in front of them, and **2 counters** in the colour of their choice. One counter is placed on the starting tile and the other in the bottom left corner of the scoring board.
- The 54 building tiles are put in the bag ready for the start of play.
- Put the **building market** in the middle of the table and the **scoring board** at the end of the table.
- **4 building tiles** are taken at random from the bag and placed in order on the four numbered squares of the **building market**, beginning with square 1.

Each player is given a **tile reserve board with a points table**

which he puts in full view in front of him. The points table shows how many there are of each kind of building tile and how many points can be won with them.

*Starting tile*

*Building market*

- The two scoring cards are taken from the **pack of money cards** and put to one side for the time being; the rest of the pack is shuffled.
  - Each player is now given their **starting money**. To do this one card at a time is taken from the money pile and placed face-up in front of a player until the **total is 20** or more (the currency is not important at this stage). The next player is then given their money. When all the players have been given their money, they pick up their cards. From now on each player's money is kept secret.
  - The player with the fewest cards starts; if two or more players are equal the player with the lowest amount of money starts. If the players are still equal the youngest starts.
  - Finally, **4 more money cards** are laid face-up in the middle of the table next to the building market.
  - The rest of the money cards are divided into five roughly equal piles. Put the "1st Scoring Round" card into the second pile and the "2nd Scoring Round" card into the fourth.
- Then put the piles on top on one another again with the fifth pile on the bottom, then the fourth, the third, the second and finally the first at the very top. The whole pile is then placed face-down next to the building market.

*Note: This ensures that no-one receives money totalling more than 28 or less than 20.*

*Note: This ensures that the two scoring cards do not come into the game too early, too late, or too soon after one another.*

## How to play

Play proceeds in a clockwise direction, beginning with the starting player.

The player whose turn it is must do one of three things:

- Take some money
- Buy and position a building tile
- Redesign their own Alhambra

After a player's turn is over any money cards and building tiles which have been removed are replaced with new ones so that there are always 4 of each.

### ■ Taking money

A player can take any one of the money cards from those lying face-up, or several money cards if they do not add up to more than 5 (the currency does not matter).

*Example: you could take both the cards on the left or one of the other two*

### ■ Buying and positioning building tiles

#### Buying the tiles

A player can buy a building tile from the building market. He must pay at least the price shown on the tile and use the currency displayed next to the tile in the building market. But take care - no change is given!

The money used to pay for the tile is placed on a discard pile next to the building market.

If you can pay the exact amount it is still your turn and you can decide once more which of the three options you would like to take.

While it is your turn no new tiles are placed on the building market. It is only at the end of your turn that the empty squares are refilled with new tiles.

*It is therefore possible to carry out a maximum of 5 actions during your turn (paying the exact amount four times and then either taking money or redesigning your Alhambra).*

#### Positioning the tiles

You can either:

add your new building tile to your Alhambra or place it on your reserve board. You can have as many building tiles on your reserve board as you want.

**Price**                      **Colour**

A building market tile is shown with a price of 10 and a blue color indicator. Red arrows point from the labels 'Price' and 'Colour' to the respective parts of the tile.

*Example: You want a garden for your Alhambra. The garden on offer costs 10. You have two money cards of this currency in your hand and decide to buy the garden. However, as you cannot pay exactly 10 of the blue currency (but only 11), your go is then over; you do not receive any change.*

Two money cards are shown, one with the number 7 and one with the number 4, both in blue currency.

A reserve board is shown with several building tiles, including a garden tile with a price of 10 and a blue color indicator.

An Alhambra board is shown with several building tiles, including a garden tile with a price of 10 and a blue color indicator.

## Rules for building your Alhambra

You must build your Alhambra according to the following rules:

- All building tiles must be **the same way round** as your starting tile (i.e. all roofs must point upwards).
- **Adjoining sides must be the same** i.e. they must either both have a wall or both not have a wall.
- You must be able to reach each new building tile **“on foot”** from the starting tile without crossing a wall and without going off the tiles.
- Each new tile must be joined to your Alhambra by **at least one side** (i.e. it cannot be joined just at a corner).
- You must not leave **any “spaces”** (i.e. an empty area surrounded on all sides by building tiles).

*The following combinations are NOT allowed:*

*The tile is the wrong way round*

*A side with a wall is joined to a side without a wall.*

*The “on-foot rule” has not been followed: the tower cannot be reached from the starting tile without crossing a wall.*

*The building tiles are not joined by at least one side.*

*Putting the “Arcades” tile in the position shown would create an empty area completely surrounded by tiles.*

## Redesigning your Alhambra

There are three ways in which you can redesign your Alhambra:

- You can take a building tile from your **reserve board** and add it to your Alhambra.
- You can **remove** a building tile from your Alhambra and **put it on your reserve board**.
- You can **exchange** a building tile on your reserve board for one in your Alhambra. If you do this the new building tile in your Alhambra must go in exactly the same place as the one you remove.

When you are redesigning your Alhambra you must still follow the building rules. **You are not allowed to remove the starting tile or exchange it for another tile.**

*Example: you buy a building tile and pay the exact amount so it is still your turn.*

*You decide to buy another building tile and you manage to pay the exact amount again.*

*It is therefore still your turn and you decide to redesign your Alhambra. You can for example remove a building tile from your Alhambra and exchange it for one on your reserve board.*

*This brings your turn to an end. You can now add your newly bought building tiles to your Alhambra by placing them in the best possible position or alternatively you can put them on your reserve board.*

## At the end of your turn

It is only **right at the end** of your turn – i.e. after any redesigning you may have carried out – that you add the **building tiles you have bought** to your Alhambra or place them on your reserve board. You can add the newly bought building tiles **in any order you wish**.

When your turn is over it is the next player's turn. Before the next player decides what to do, any **money cards or building tiles which have been removed** are replaced with **new ones** so that there are four of each again. If you reach the end of the money cards the discarded money is shuffled and placed face-down to make a new pile.

*Example: the tiles on 2 and 4 have been removed. The squares are refilled in order – the first tile goes on 2 and the second on 4.*

## Scoring

There are **3 scoring rounds** during the game. The first two take place when the scoring cards are drawn from the pile of money cards. The third and **final scoring round takes place at the end of the game**.

When a scoring card is drawn it is put to one side (withdrawn from the game) and the next card or cards are used to make the number of money cards up to four. But before the next player starts his turn the scores are calculated.

In each scoring round, points are awarded to whoever has the most of each kind of building. Players are also given points for the length of the wall around their Alhambras.

### Points for having the most of each kind of building

Points are awarded for **having the highest number of one of the different kinds of buildings**. The number of points a player receives depends on which kind of building it is.

In each case, the player with the most buildings is awarded the points for 1st place indicated on the scoring card next to the name of the building.

Only the players with the **most buildings** of each kind receive points when the “1st Scoring Round” card is drawn.

Points are awarded in the later rounds as follows: in the “**2nd Scoring Round**” (which takes place when the “2nd Scoring Round” card is drawn), **points are awarded to the players with the highest number and second highest number of building tiles of each kind**.

If several players tie, the **points** for the respective places are **shared**. Points are always rounded down.

The 3rd round of scoring takes place at the end of the game; points are then also awarded to the players with the third highest number of buildings of each kind as shown in the example and on the **points table on the tile reserve board**.

**Take care: building tiles on the reserve boards are NOT counted towards players' scores.**

*Note: the price of the building is not important for the scoring, just the number of tiles! You must have at least 1 building tile of a particular kind to be awarded points for that category*

A	
◆	1
◆◆	2
◆◆◆	3
◆◆◆◆	4
◆◆◆◆◆	5
◆◆◆◆◆◆	6

*Example:  
The player with the most chambers is awarded 4 points.*

B		
◆	8	1
◆◆	9	2
◆◆◆	10	3
◆◆◆◆	11	4
◆◆◆◆◆	12	5
◆◆◆◆◆◆	13	6

*Example:  
The player with the most towers is awarded 13 points.  
The player with the second highest number of towers is awarded 6 points.*

*Example:  
Kim and Nina each have 4 towers. They share the points for 1st and 2nd place:  $13 + 6 = 19$  points. The number is divided by two and rounded down so they are each awarded 9 points.*

	1.	2.	3.
7x ◆	1	8	1
7x ◆◆	2	9	2
9x ◆◆◆	3	10	3
9x ◆◆◆◆	4	11	4
11x ◆◆◆◆◆	5	12	5
11x ◆◆◆◆◆◆	6	13	6
	1.	2.	3.
	1	2	3
	16	8	1
	17	9	2
	18	10	3
	19	11	4
	20	12	5
	21	13	6

*These are the points awarded in the 3rd scoring round.*

*Example: The player with the highest number of pavilions is awarded 16 points. The player with the second highest number of pavilions is awarded 8 points. The player with the third highest number of pavilions is awarded 1 point.*

## Points for the wall around your Alhambra

As well as points for buildings, players are also awarded points for the **longest joined wall** around their Alhambras.

Each side of a tile with a wall segment on it counts for **1 point**.

No points are awarded for walls which are back-to-back, i.e. internal walls.

The points awarded to a player are recorded on the **scoring board**. Each player moves their counter one space forward for each point that they have been awarded.

## End of the game

The game ends when – at the end of a player’s turn – there are not enough building tiles left in the bag to bring the total up to four again.

The remaining building tiles from the building market are given to the players who have the most money of the respective currency in their hand (it does not matter how much the building costs). If two or more players have the same amount of money then that building tile remains on the building market. Building tiles given to players in this way may then be added to their Alhambras in accordance with the building rules.

The third and final scoring round now takes place.

The player who leads on the scoring board after this last round has won. If two players are level the game is a draw.

*Note: the building market is refilled with the remaining tiles as far as possible.*

## Special rules for playing with just two players

The normal Alhambra rules apply with the following changes:

The pack contains three of each money card; **one of each is removed**, i.e. only **72 money cards** are used.

There is an **imaginary third player**. Let us call him Dirk. Dirk does not build an Alhambra but **does collect building tiles**. Dirk does not have any turns.

**At the beginning of the game 6 building tiles are drawn randomly from the bag** and put to one side for Dirk – in full view of both players.

**In the scoring rounds Dirk is awarded points for having the most of any of the different kinds of building** but not for an external wall.

**Directly after the first scoring round Dirk is given 6 more**

tiles...

**Dirk is given 6 more tiles** which are also randomly drawn from the bag and placed with his others.

After the **2nd scoring round Dirk is given more building tiles**. This time he is not necessarily given 6 but is instead given **a third of the tiles remaining in the bag (rounded down)**.

Only one rule is different for the two players: whenever they buy a building tile they can not only add it to their Alhambra or place it on their reserve board; they can also **give the building tile to Dirk**.
